

HOBOKEN BODY ART

TATTOO AFTERCARE INSTRUCTIONS

Hoboken Body Art is not responsible for the aftercare or healing process of your new tattoo. YOU ARE. Please READ and FOLLOW our care instructions to be sure your tattoo heals properly.

1. Keep your tattoo covered for 1-2 hours
 - a. Do not rebandage
2. WASH with warm water & antibacterial soap.
 - a. Use dial liquid soap
 - b. Use your clean hands to wash the tattoo
3. Pat your tattoo to dry.
 - a. Do no rub
4. Use A&D ointment or Aquaphor
 - a. Only use for the first 2 days
 - b. Use light layer of ointment 2 or 3 times per day
 - c. DO NOT saturate your tattoo in ointment
5. Switch from ointment to moisturizer after the second day.
 - a. We suggest using Lubriderm or Curel
 - b. Continue using for two weeks

THINGS YOU SHOULD KNOW

Your tattoo will begin the scabbing process within the first two days. DO NOT remove or pick the scabbed tattoo. If the scabs are removed too early, the ink will also be removed. Our tattoo artists can tell if your tattoo has been picked so please do not try and convince us otherwise. After the scabbing process, your tattoo will have a layer of dry skin for the remaining of the healing time. Use the recommended moisturizer. Keep in mind that using fragranced soap or moisturizer can damage your tattoo. We recommend not going to the gym until the healing process has finished. Exposing your new tattoo to dirty or unsanitary conditions can cause major problems with your healing process and overall quality of your tattoo. NO SWIMMING OR TANNING for two weeks. Finally, your tattoo should be fully healed in 2-3 weeks.
